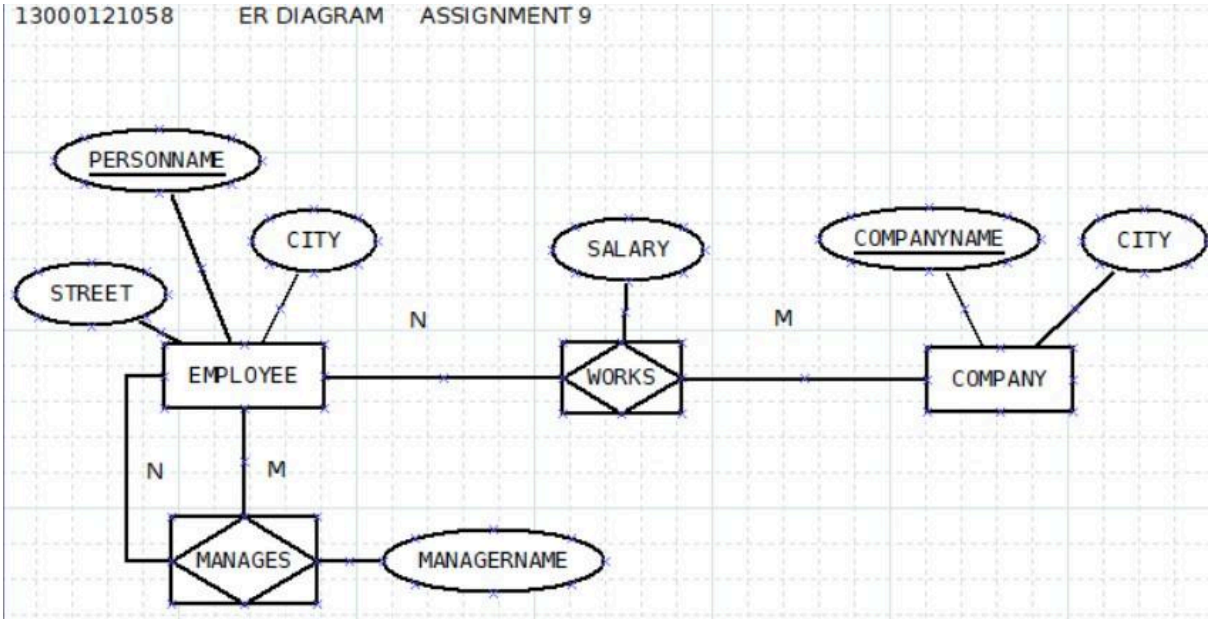
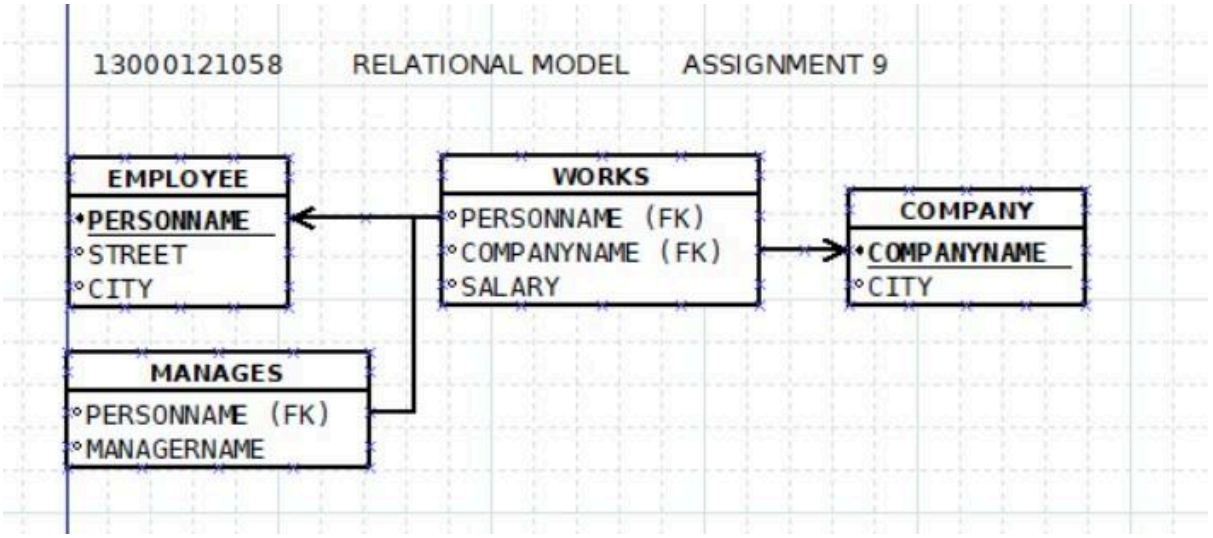
ASSIGNMENT 9

Consider the following relations and Draw the ER, EER Diagram, Relational Model and write the SQL statement for the following queries:





Create the tables and insert 5 sets of records into each.
employee (personname, street, city)
works (personname, companyname, salary)
company (companyname, city)
manages (personname, managername)

```
CREATE TABLE EMPLOYEE(
        PERSONNAME VARCHAR2(20) PRIMARY KEY,
        STREET VARCHAR2(20),
        CITY VARCHAR2(20)
);
```

```
SQL> CREATE TABLE EMPLOYEE(
  2     PERSONNAME VARCHAR2(20) PRIMARY KEY,
  3     STREET VARCHAR2(20),
  4     CITY VARCHAR2(20)
  5  );

Table created.

SQL> DESC EMPLOYEE;
 Name                                                                                    Null?    Type
 --------------------------------------------------------------------------------------- -------- ------------------
 PERSONNAME                                                                              NOT NULL VARCHAR2(20)
 STREET                                                                                           VARCHAR2(20)
 CITY                                                                                             VARCHAR2(20)

SQL>
```

CREATE TABLE WORKS(
PERSONNAME VARCHAR2(20),
COMPANYNAME VARCHAR2(20),
SALARY NUMBER,
CONSTRAINT WFK1 FOREIGN KEY (PERSONNAME) REFERENCES EMPLOYEE(PERSONNAME) ON DELETE CASCADE,
CONSTRAINT WFK2 FOREIGN KEY (COMPANYNAME) REFERENCES COMPANY(COMPANYNAME) ON DELETE CASCADE);

```
SQL> CREATE TABLE WORKS(
  2     PERSONNAME VARCHAR2(20),
  3     COMPANYNAME VARCHAR2(20),
  4     SALARY NUMBER,
  5     CONSTRAINT WFK1 FOREIGN KEY (PERSONNAME) REFERENCES EMPLOYEE(PERSONNAME),
  6     CONSTRAINT WFK2 FOREIGN KEY (COMPANYNAME) REFERENCES COMPANY(COMPANYNAME)
  7  );

Table created.

SQL> DESC WORKS;
 Name                                                                                    Null?    Type
 --------------------------------------------------------------------------------------- -------- ------------------
